## List of Contents

### NUMBER 1

| | | |
|---|---|---|
| **J. H. Kim** and **S. B. Lee** | 1 | Prediction of crack opening stress for part-through cracks and its verification using a modified strip-yield model |
| **Robert Firmature** and **Sharif Rahman** | 15 | Elastic–plastic analysis of off-center cracks in cylindrical structures |
| **F. D. Fischer** and **F. G. Rammerstorfer** | 41 | A note on a simple recategorisation of cracks in fatigue analysis |
| **Larissa Gorbatikh** and **Mark Kachanov** | 51 | A simple technique for constructing the full stress and displacement fields in elastic plates with multiple cracks |
| **Arne S. Gullerud, Xiaosheng Gao, Robert H. Dodds Jr** and **R. Haj-Ali** | 65 | Simulation of ductile crack growth using computational cells: numerical aspects |
| | I | Calendar |

### NUMBER 2

| | | |
|---|---|---|
| **N. W. Klingbeil** and **J. L. Beuth** | 93 | On the design of debond-resistant bimaterials<br>Part I: Free-edge singularity approach |
| **N. W. Klingbeil** and **J. L. Beuth** | 111 | On the design of debond-resistant bimaterials<br>Part II: A comparison of free-edge and interface crack approaches |
| **Ravindra Patankar** and **Asok Ray** | 129 | State-space modeling of fatigue crack growth in ductile alloys |
| **Y. L. Li, S. Y. Hu** and **Y. Y. Yang** | 153 | Stresses around the bond edges of axisymmetric deformation joints |
| **Michael A. Sutton, Michael L. Boone, Fashang Ma** and **Jeffrey D. Helm** | 171 | A combined modeling–experimental study of the crack opening displacement fracture criterion for characterization of stable crack growth under mixed mode I/II loading in thin sheet materials |
| **Antonio Bobet** | 187 | The initiation of secondary cracks in compression |
| | 221 | Calendar |

## NUMBER 3

**L.-W. Wei** and **M. N. James** 223 A study of fatigue crack closure in polycarbonate CT specimens

**Gustavo V. Guinea, Jaime Planas** and **Manuel Elices** 243 $K_I$ evaluation by the displacement extrapolation technique

**Ki-Ju Kang** and **Hyeon Gyu Beom** 257 Plastic zone size near the crack tip in a constrained ductile layer under mixed mode loading

**D. N. dell'Erba** and **M. H. Aliabadi** 269 On the solution of three-dimensional thermoelastic mixed-mode edge crack problems by the dual boundary element method

**J.-Cl. De Bremaecker, M. C. Ferris** and **D. Ralph** 287 Compressional fractures considered as contact problems and mixed complementarity problems

**D. W. Nicholson, P. Ni** and **Y. Ahn** 305 Probabilistic theory for mixed mode fatigue crack growth in brittle plates with random cracks

**Shin-Young Lee** and **Ji-Ho Song** 321 Crack closure and growth behavior of physically short fatigue cracks under random loading

347 Calendar

## NUMBER 4

**T. Fett** 349 Estimation of stress intensity factors for semi-elliptical surface cracks

**Franz O. Riemelmoser, Peter Gumbsch** and **Reinhard Pippan** 357 Plastic deformation at short edge cracks under fatigue loading

**T. Fett, D. Munz, R. D. Geraghty** and **K. W. White** 375 Influence of specimen geometry and relative crack size on the $R$-curve

**X. H. Liu, Z. Suo, Q. Ma** and **H. Fujimoto** 387 Developing design rules to avert cracking and debonding in integrated circuit structures

**H. K. Lee, K. S. Kim** and **C. M. Kim** 403 Fracture resistance of a steel weld joint under fatigue loading

421 Calendar

## NUMBER 5

**M. Lorentzon** and **K. Eriksson** 423 A path independent integral for the crack extension force of the circular arc crack

**Adrian Loghin, Ningsheng Zhang** and **Paul F. Joseph** 441 A nonlinear finite element eigenanalysis of antiplane shear including higher order terms

**H. Rajaram, S. Socrate** and **D. M. Parks** 455 Application of domain integral methods using tetrahedral elements to the determination of stress intensity factors

**Kentaro Yamada, Qiuliang Cao** and **Naoki Okado** 483 Fatigue crack growth measurements under spectrum loading

499 Calendar

## NUMBER 6

*In Memoriam*

**E. E. Gdoutos** and **N. P. Andrianopoulos** 501 Pericles S. Theocaris (1921–1999)

**Xiaobo Yu** and **Andras Abel** 503 Crack surface interference under cyclic mode I and steady mode II loading. Part I: Experimental study

**Xiaobo Yu** and **Andras Abel** 519 Crack surface interference under cyclic mode I and steady mode II loading. Part II: Modelling analysis

**L. Tosal, C. Rodríguez, F. J. Belzunce** and **C. Betegón** 537 Comparison of the static and dynamic fracture behaviour of an AE-460 structural steel

**S. Roy Chowdhury** and **R. Narasimhan** 551 A finite element analysis of quasistatic crack growth in a pressure sensitive constrained ductile layer

**S. Kamiya, T. Yamauchi** and **H. Abé** 573 Three-dimensional simulation of crack extension in brittle polycrystalline materials

**B. L. Josefson, T. Svensson, J. W. Ringsberg, T. Gustafsson** and **J. de Maré** 587 Fatigue life and crack closure in specimens subjected to variable amplitude loads under plane strain conditions

*Short communication*

**J.-Cl. DeBremaecker** and **M. C. Ferris** 601 A comparison of two algorithms for solving closed crack problems
